

# Signing up for Coinbase

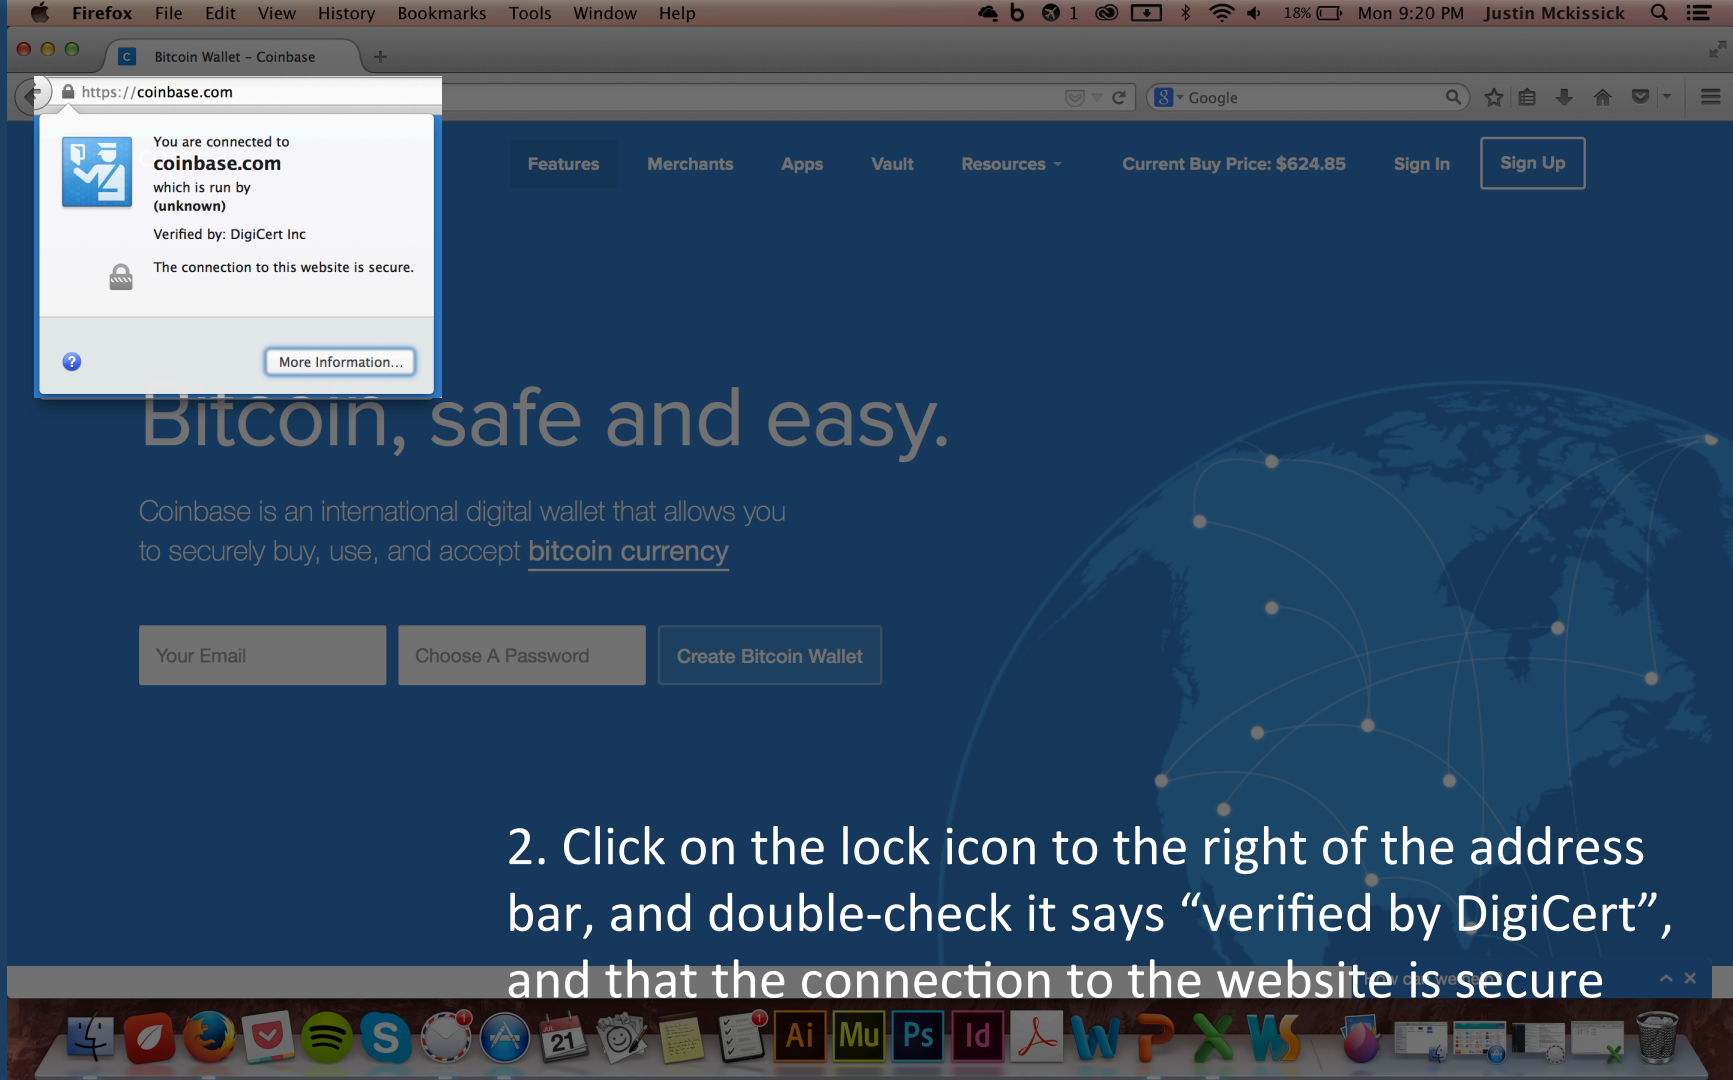

# Overview

1. Setting up your initial account
2. Verifying your email address
3. Setting up two-factor authentication via your mobile phone
4. Creating your first Bitcoin address

1. Type “https://www.coinbase.com” into the address bar of your internet browser (for these examples Firefox is used)

2. Click on the lock icon to the right of the address bar, and double-check it says “verified by DigiCert”, and that the connection to the website is secure

Sign Up

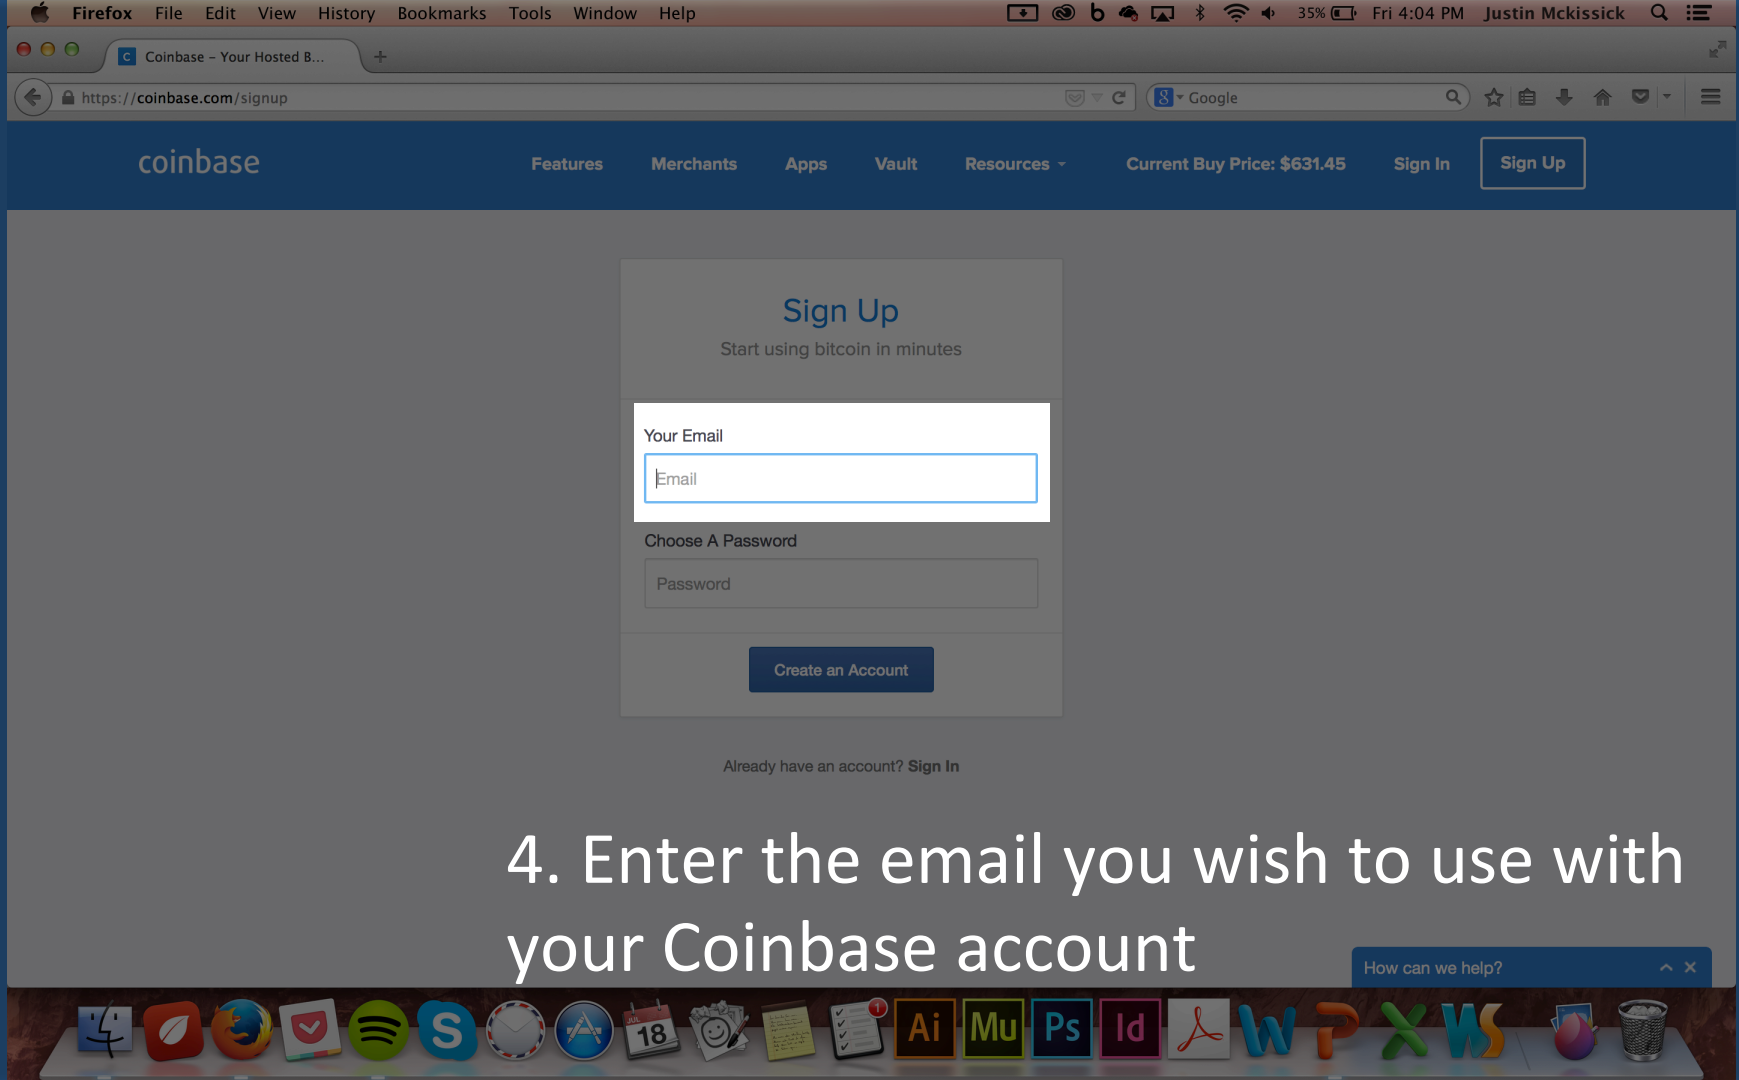

# Bitcoin, safe and easy.

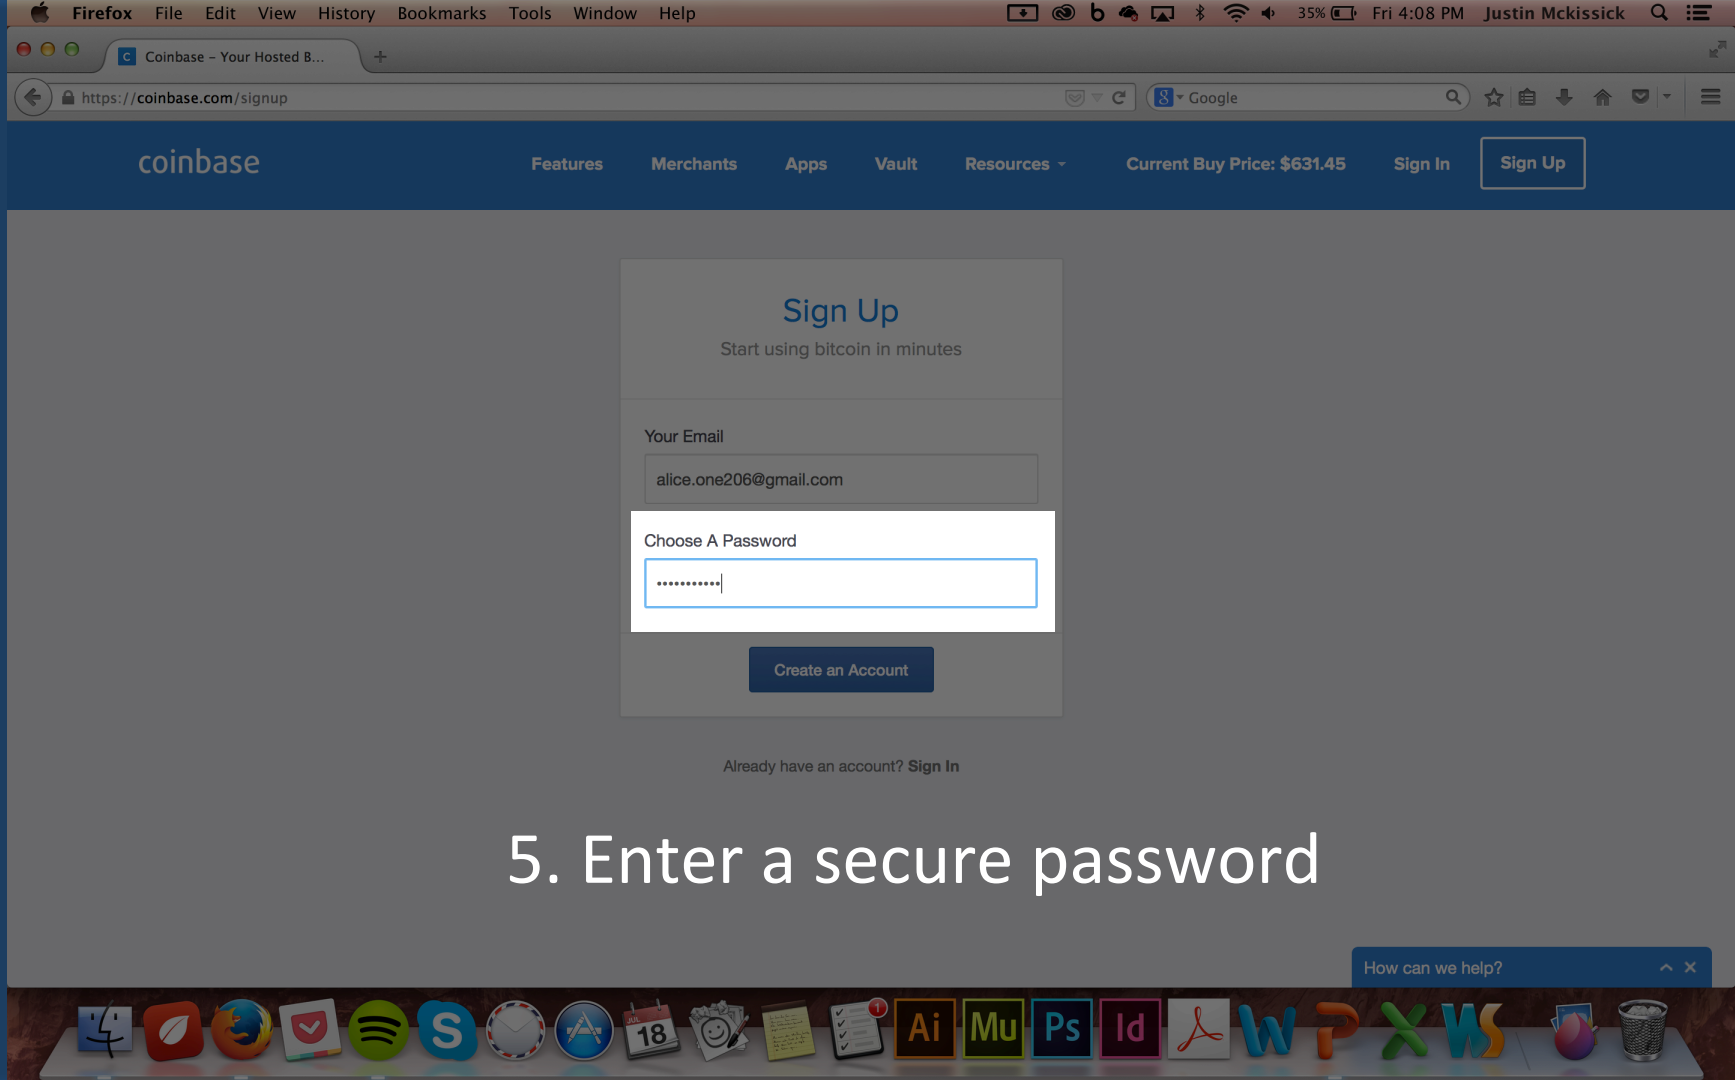

Coinbase is an international digital wallet that allows you to securely buy, use, and accept bitcoin currency

## 3. Click on the “Sign Up” button

https://coinbase.com/signup

How can we help?

5. Enter a secure password

**1Password**

In order to create a strong password, the  
1Password application will be used

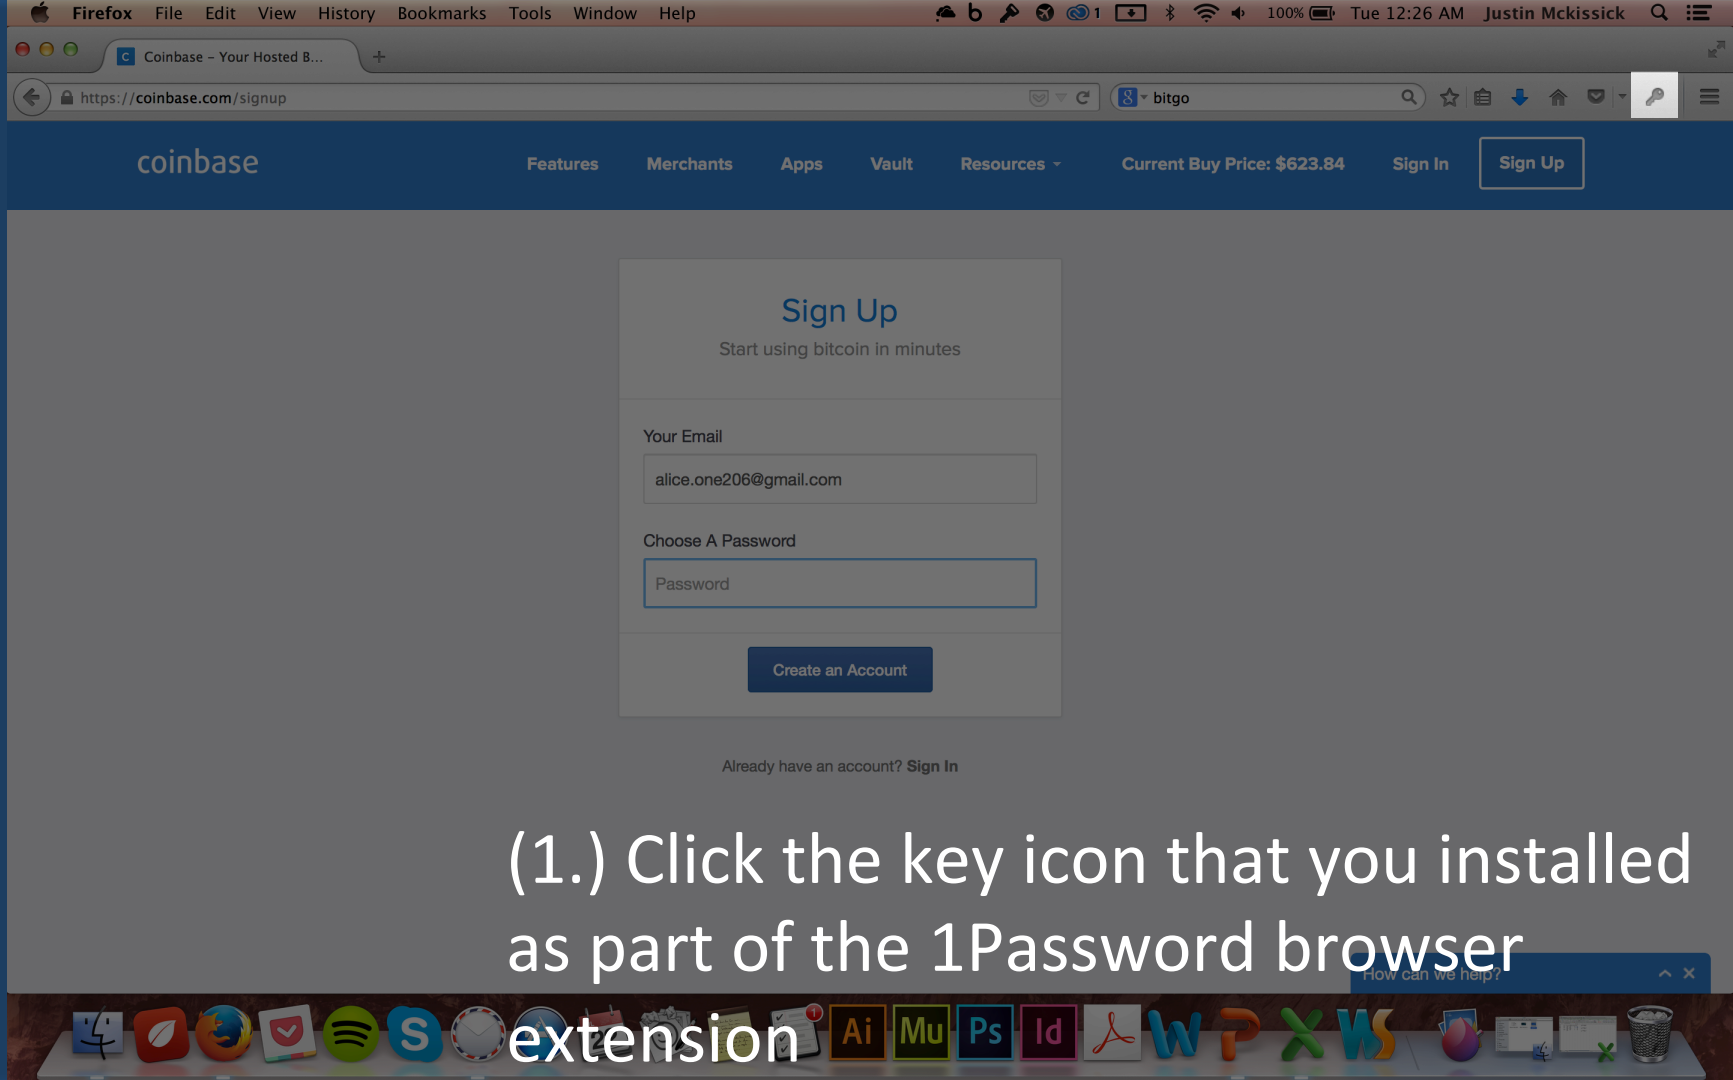

For the next few slides the 1Password application as well as the downloadable browser extension will be used

For more information on 1Password and how to use it, go to

<https://agilebits.com/onepassword>

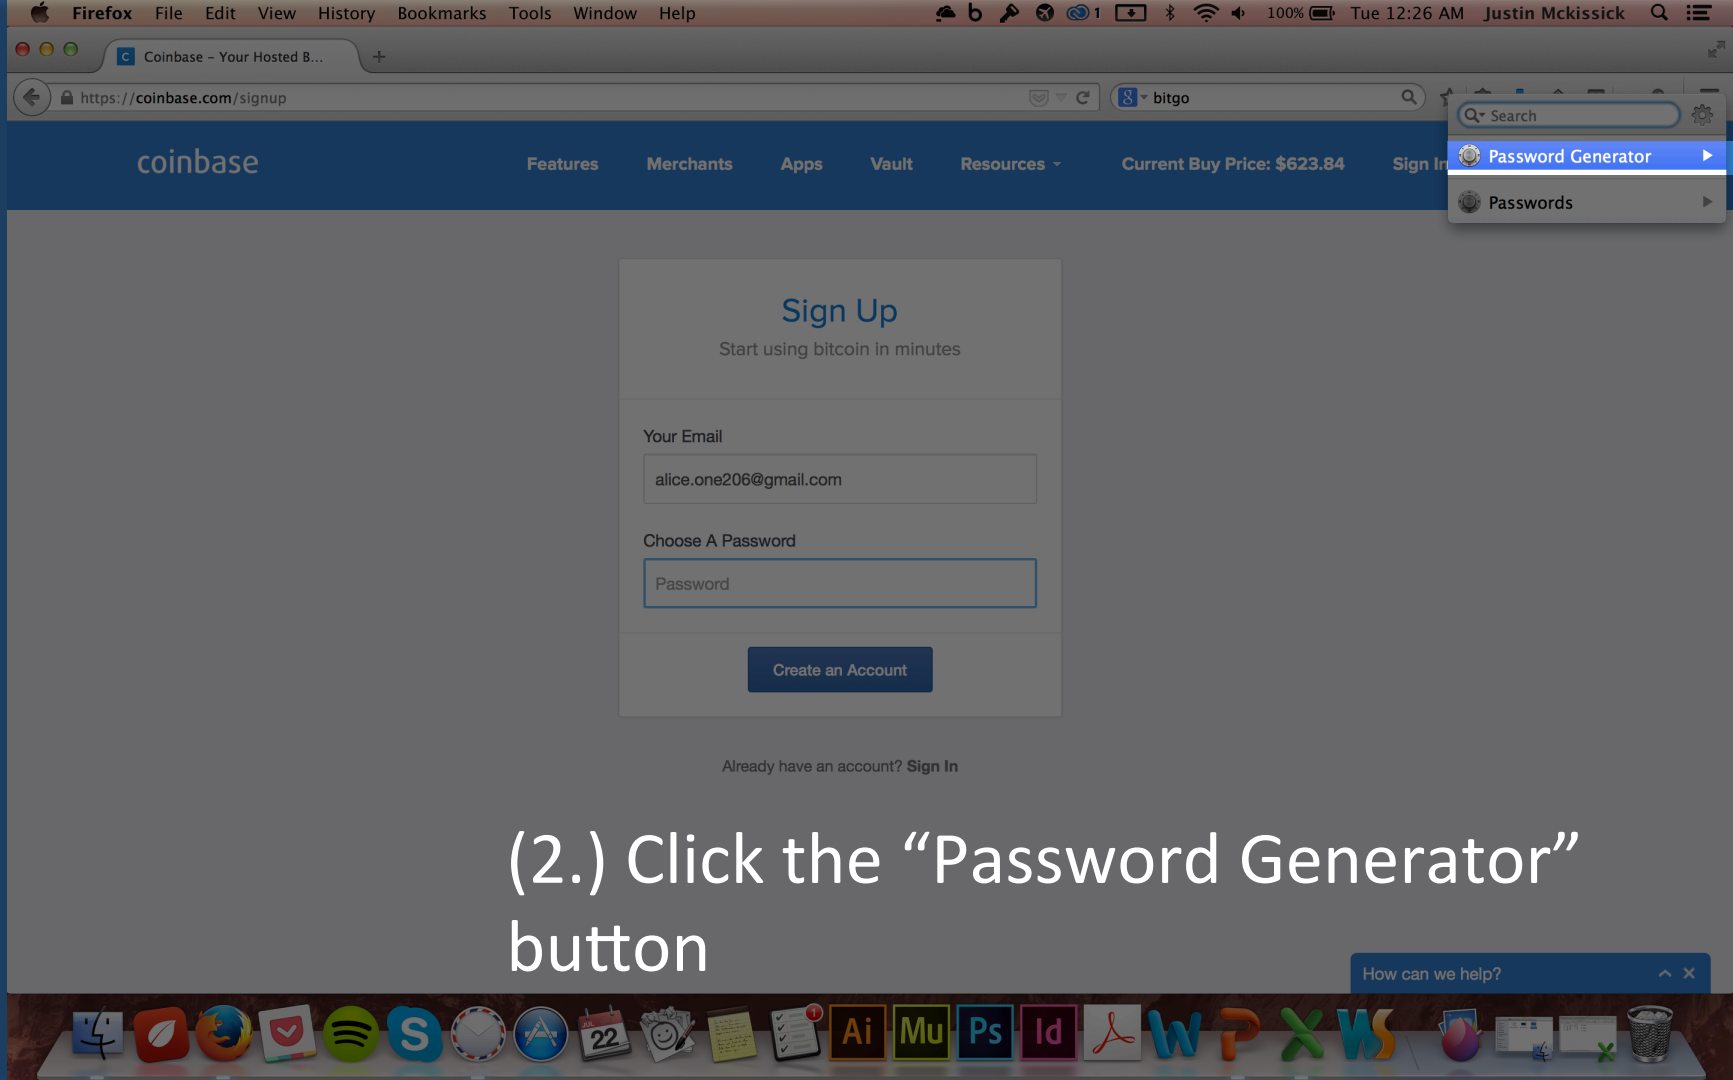

**1Password**

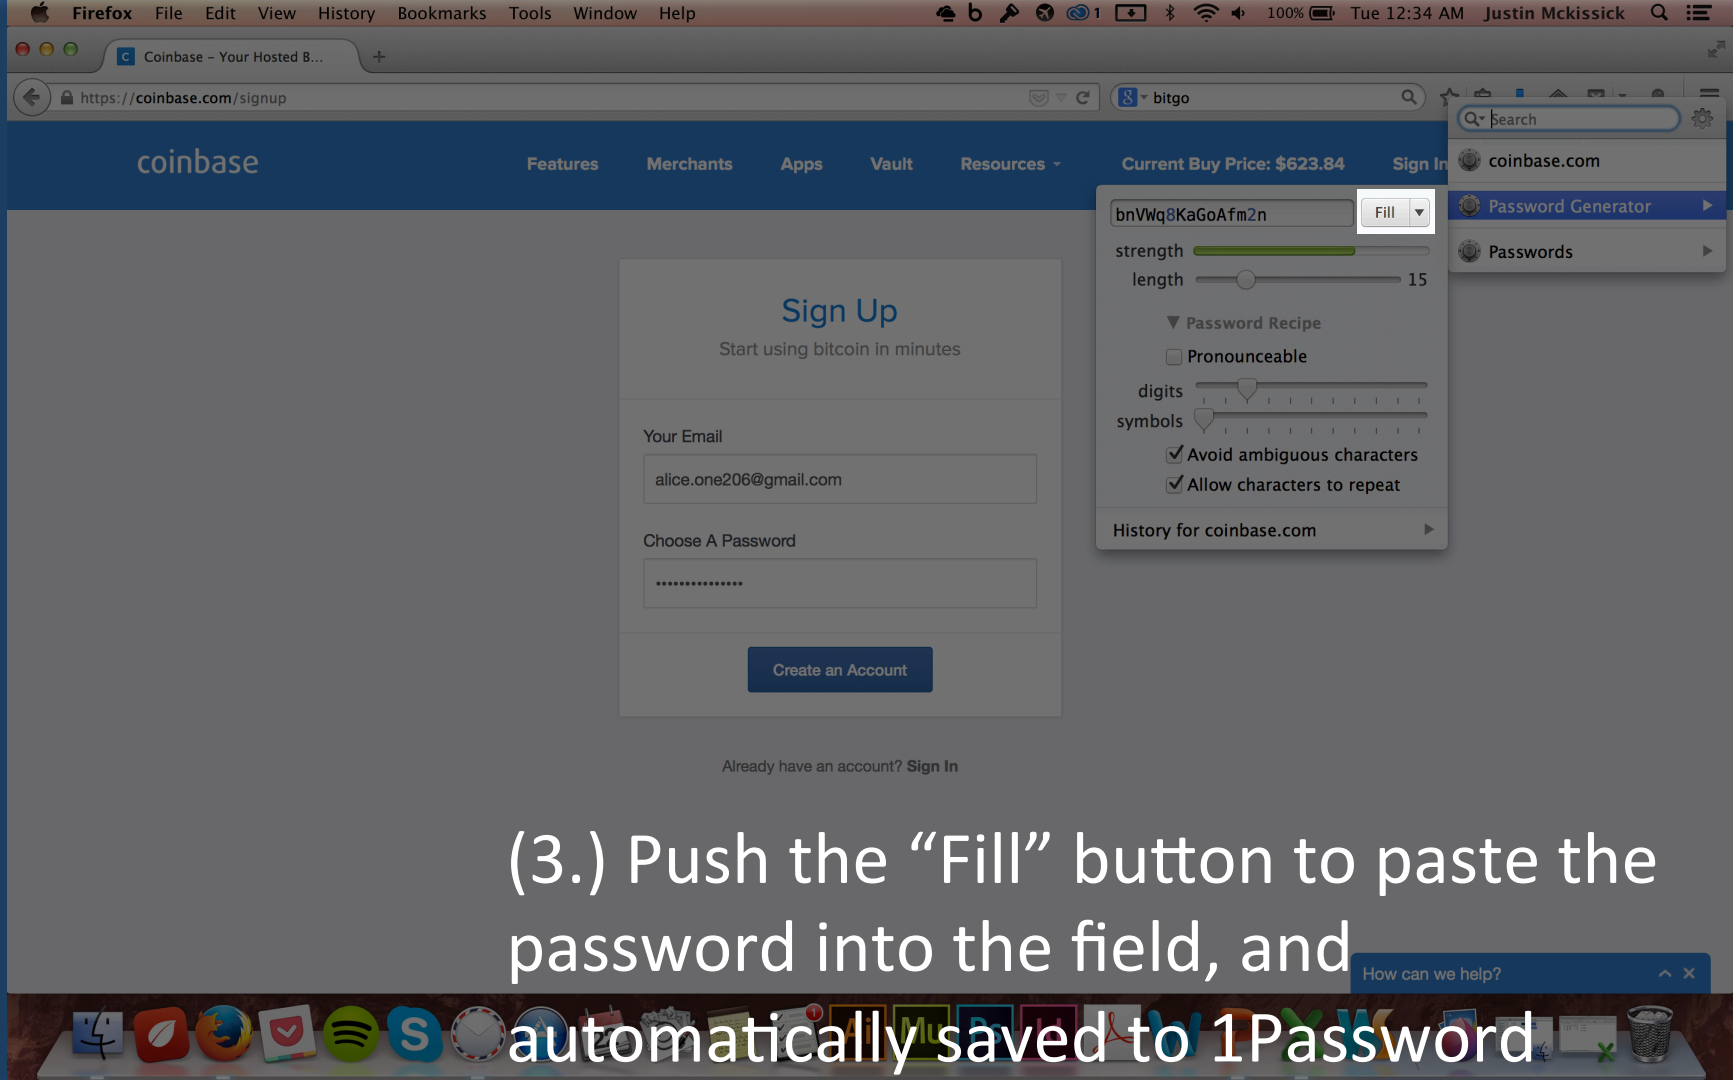

(1.) Click the key icon that you installed  
as part of the 1Password browser  
extension

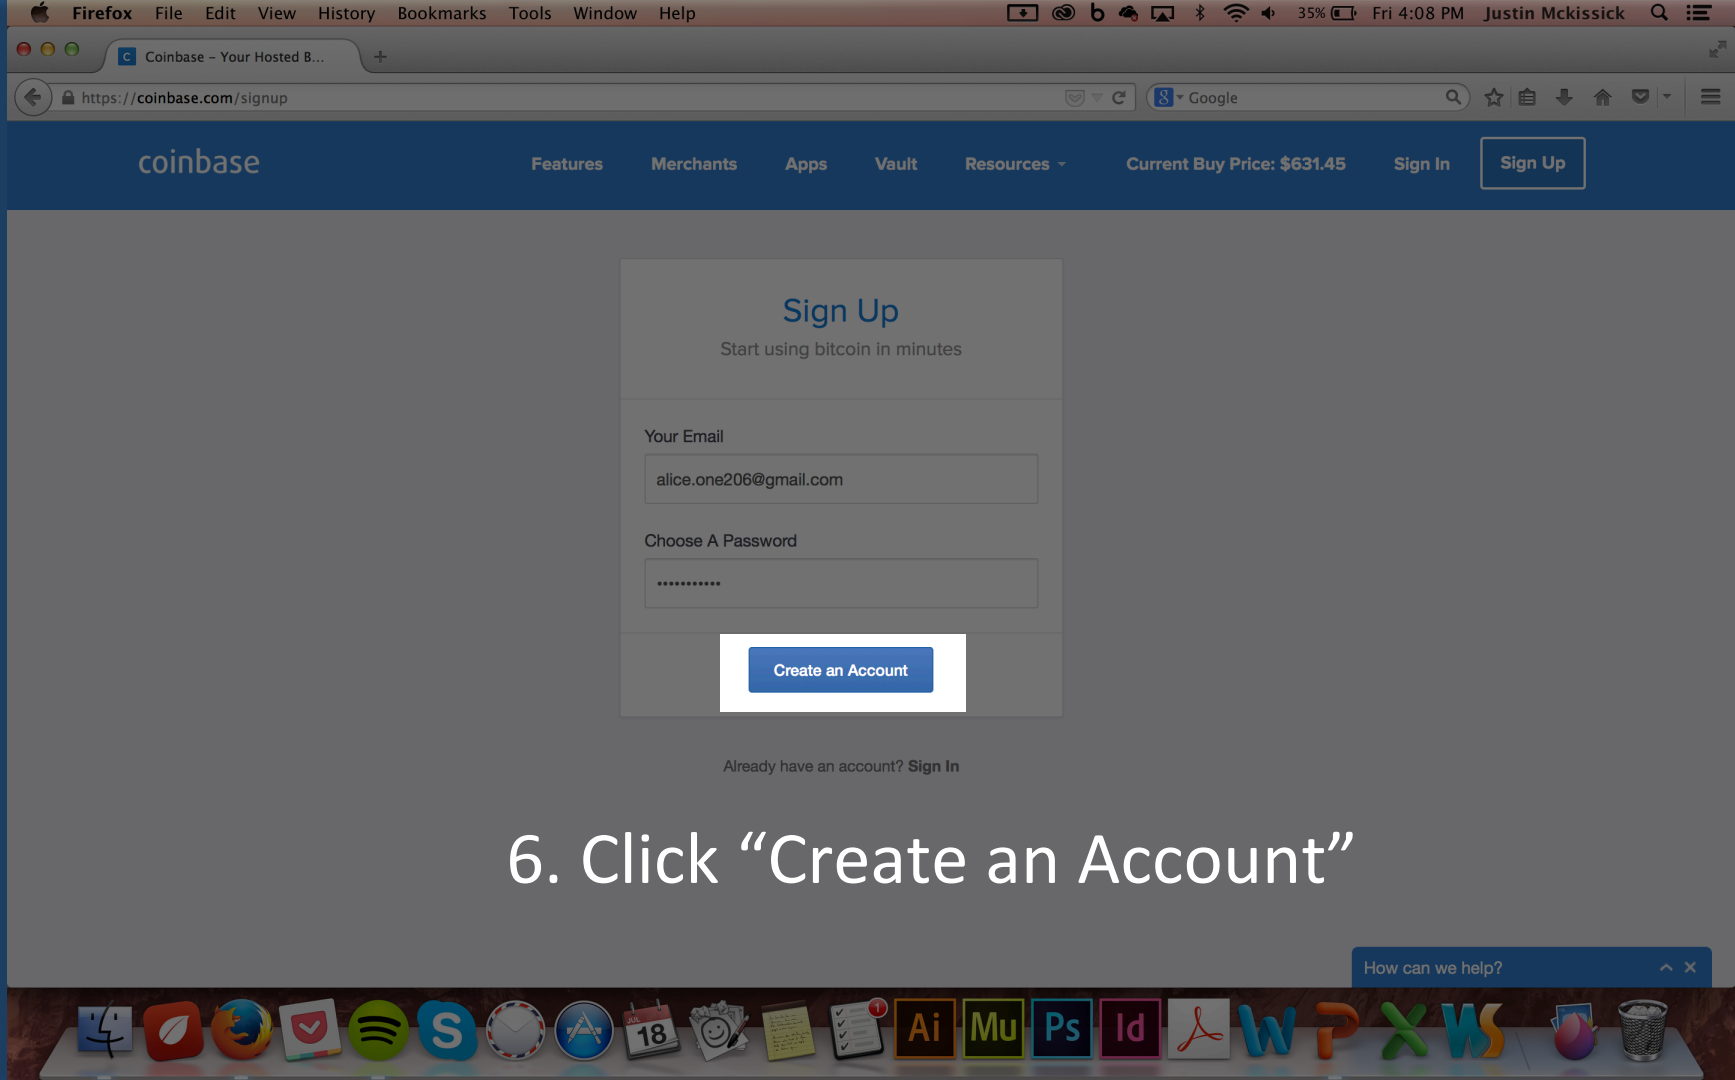

(2.) Click the “Password Generator” button

(3.) Push the “Fill” button to paste the password into the field, and automatically saved to 1Password

6. Click “Create an Account”

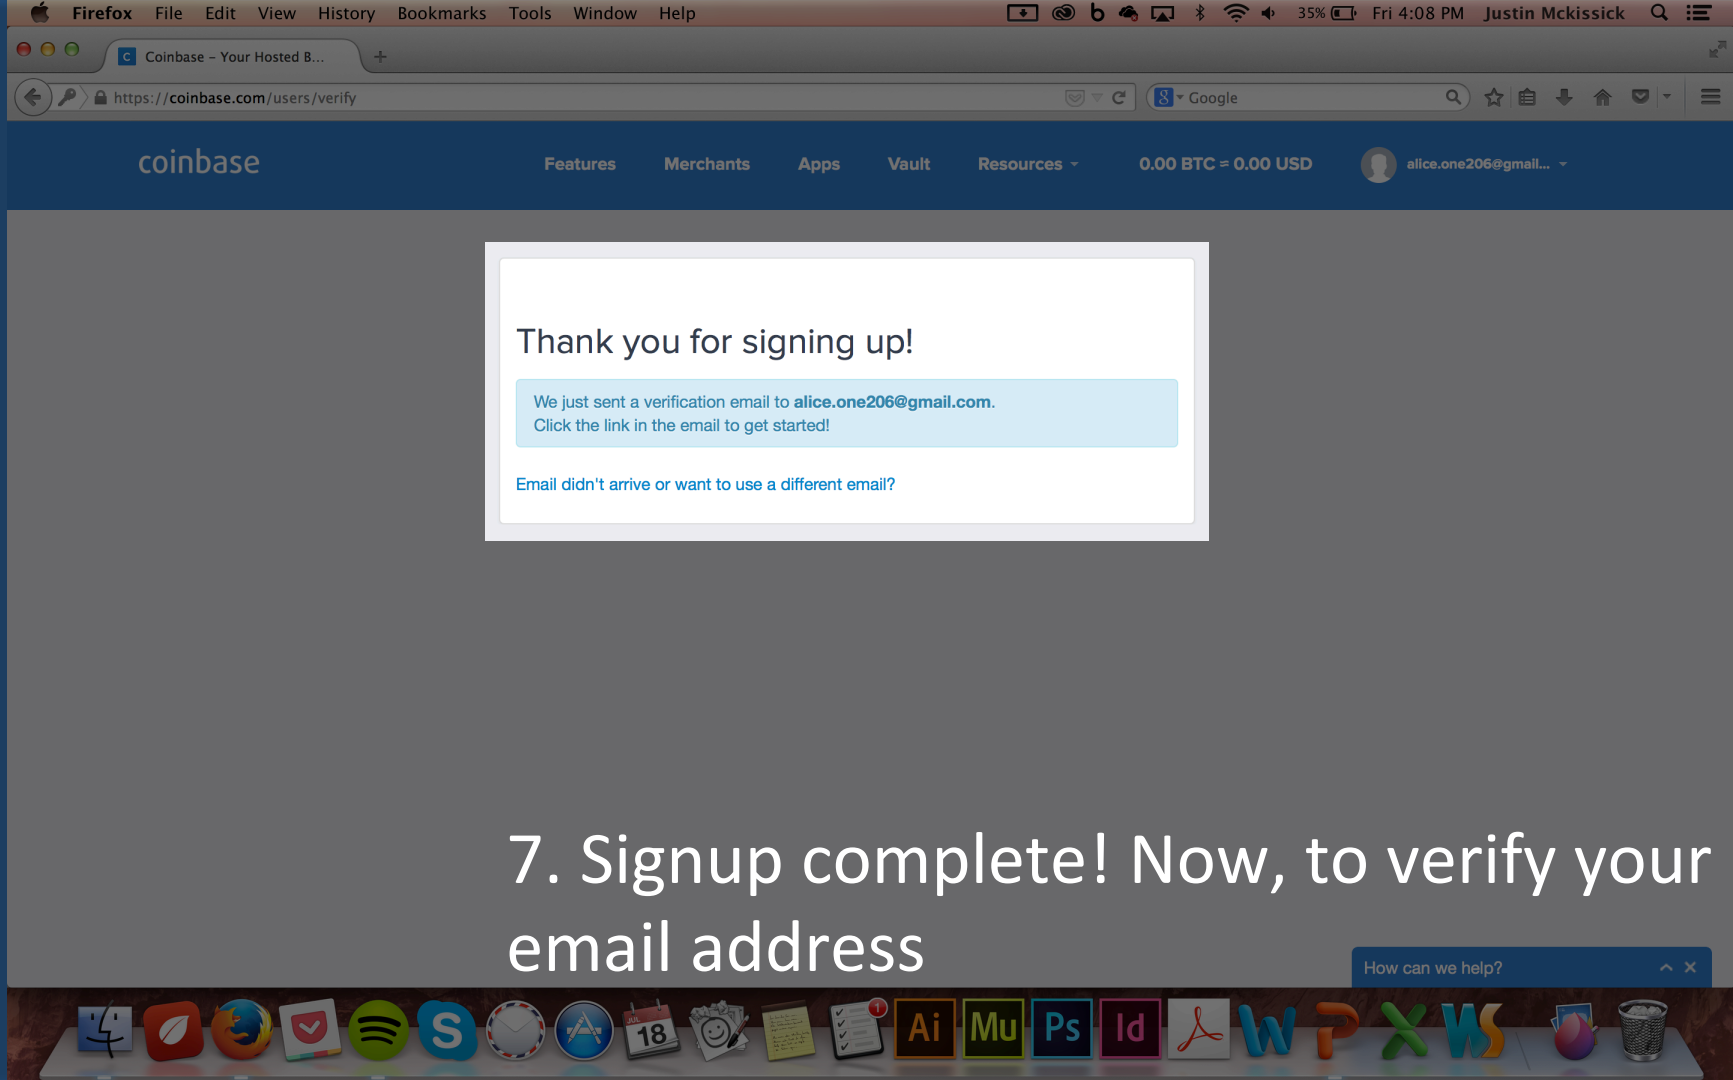

**1Password**

This concludes the usage of 1Password to  
create a strong password for Coinbase

Congratulations, you now have a  
Coinbase account

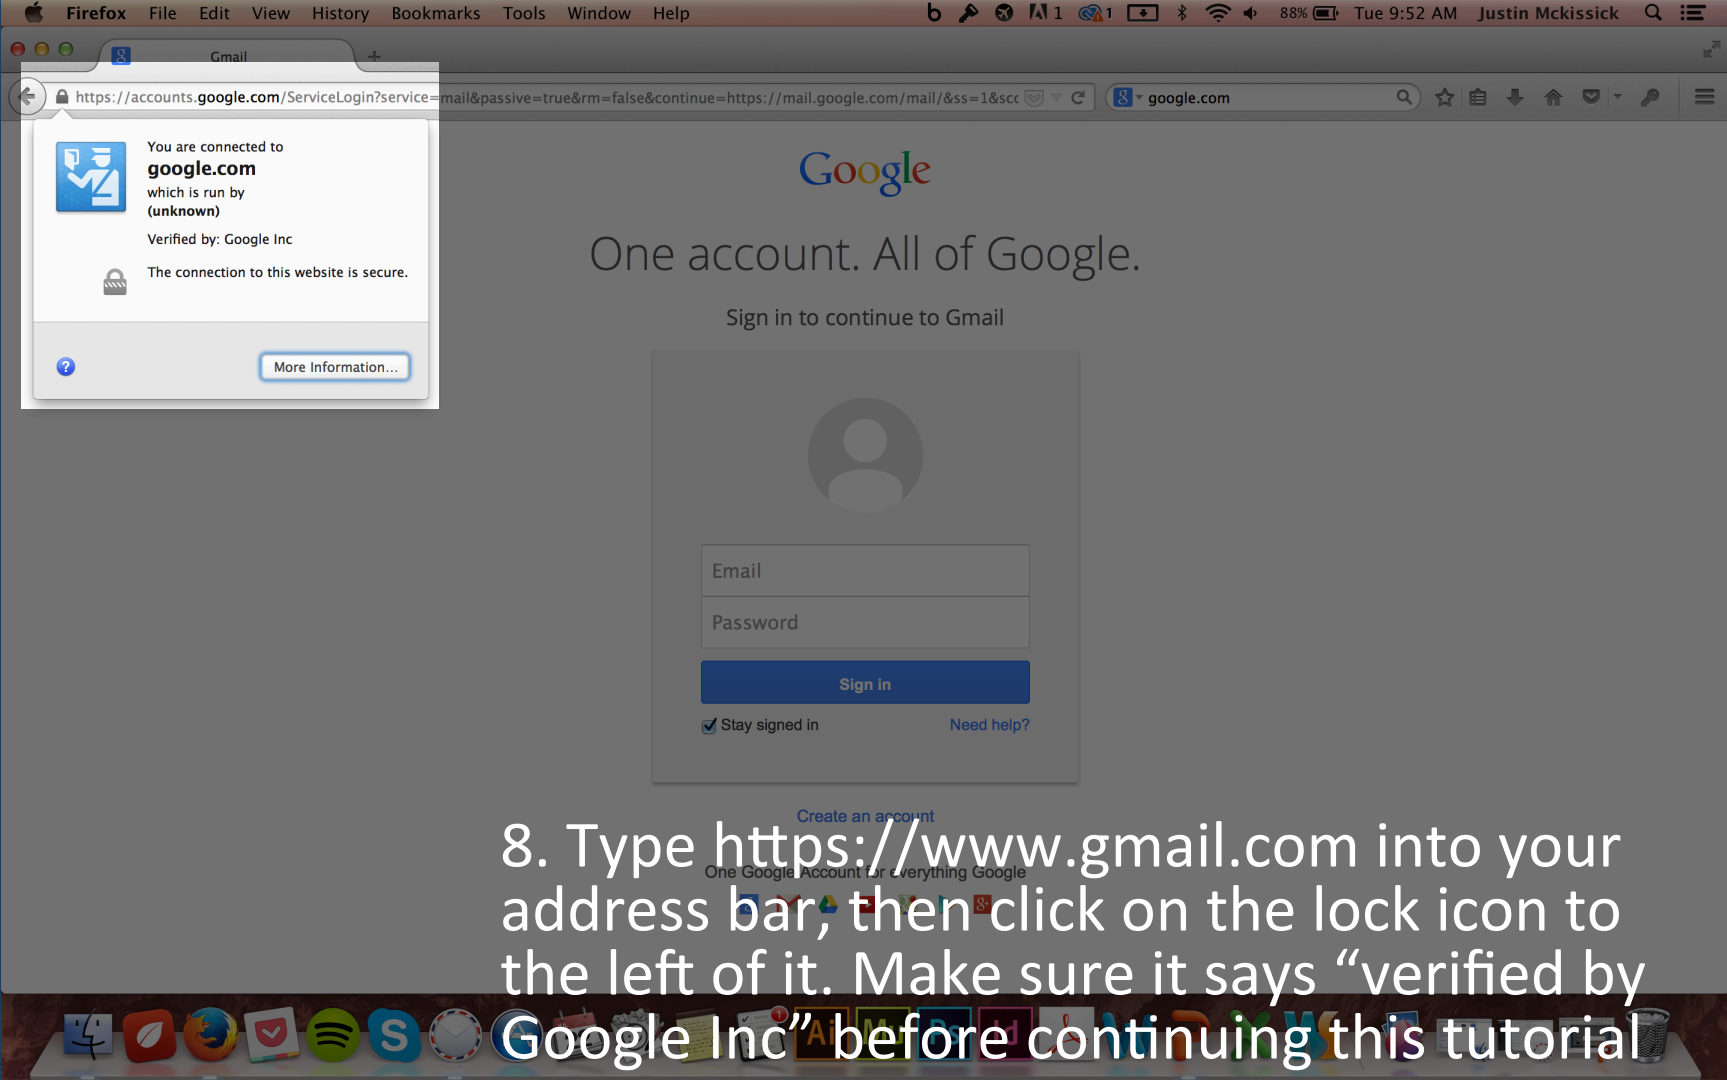

Now to verify your email address

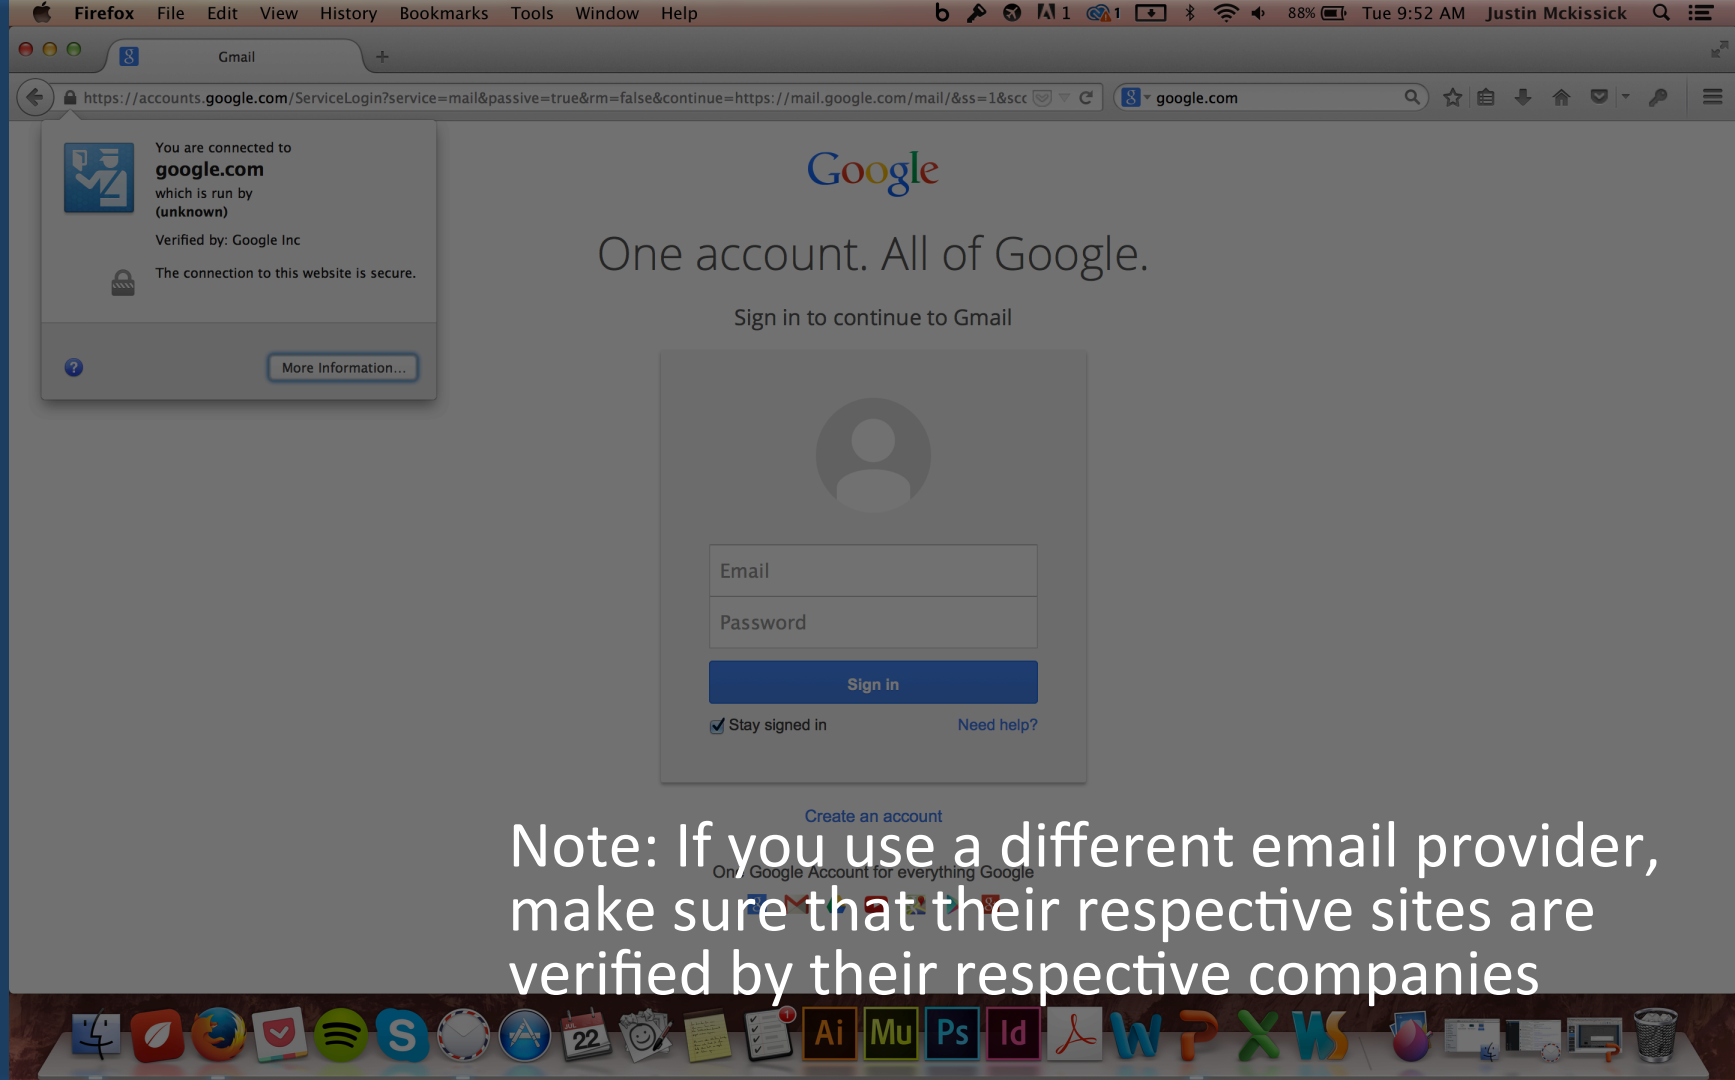

7. Signup complete! Now, to verify your email address

How can we help?

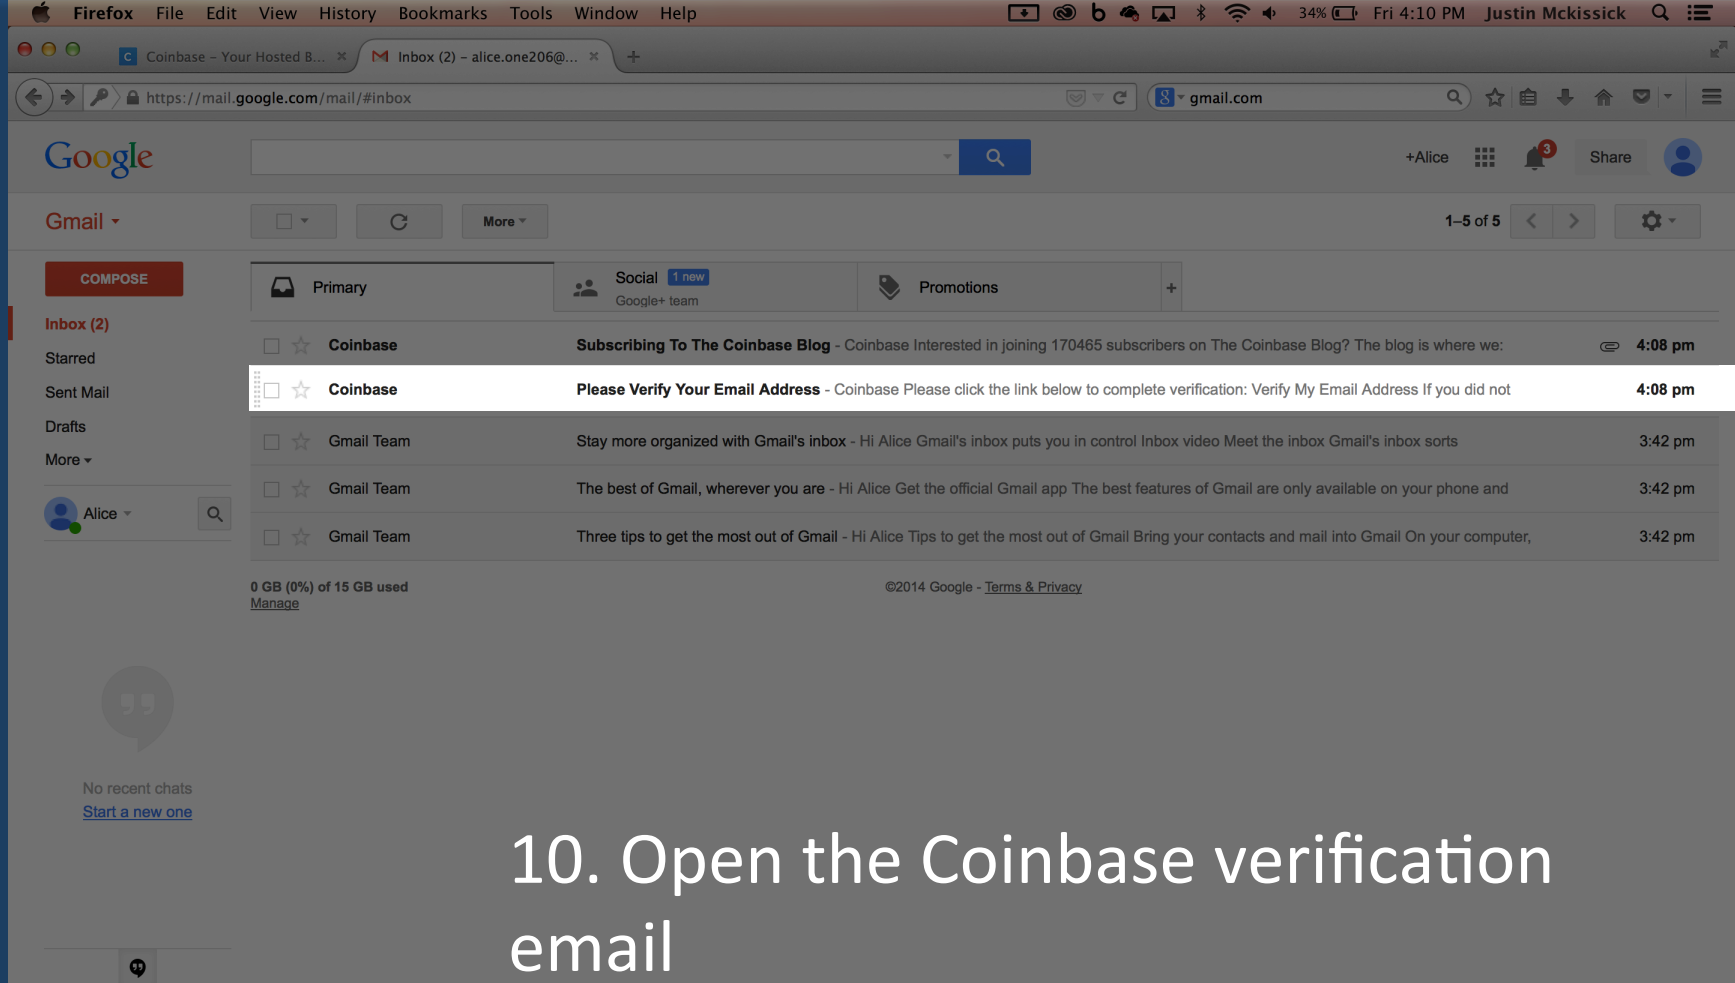

Note: If you use a different email provider, make sure that their respective sites are verified by their respective companies

10. Open the Coinbase verification email

## Please Review Our User Agreement

This User Agreement ("Agreement") is a contract between you ("you," "your" or "user") and Coinbase, Inc. ("Coinbase," "we," "us" or "our") and applies to your use of: (a) the Coinbase website located at [coinbase.com](https://coinbase.com), the Coinbase API, and any associated Coinbase-hosted websites or mobile applications (collectively the "Coinbase Site"), and (b) any of the services provided to you by Coinbase (together with the Coinbase Site, the "Coinbase Services").

We may amend or modify this Agreement at any time by posting a revised User Agreement on the Coinbase Site and such changes or modifications shall be effective at such time. By continuing to access or use the Coinbase Services after we have posted a revised Agreement, you agree to be bound by the modified Agreement. **In the event that you do not agree to be bound by the modified Agreement, you must cancel your Coinbase Account in the manner described in Section 2.6 below and otherwise cease accessing or using the Coinbase Services.** You further agree that we may (a) modify or discontinue any portion of the Coinbase Services, and (b) suspend or terminate your access to the Coinbase Services, at any time, and from time to time, without

15. Click the “Verify a Phone” button

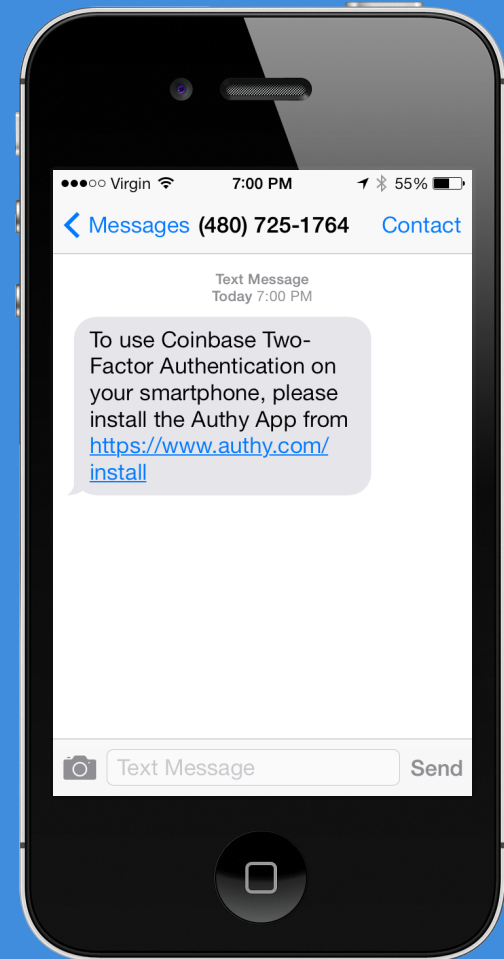

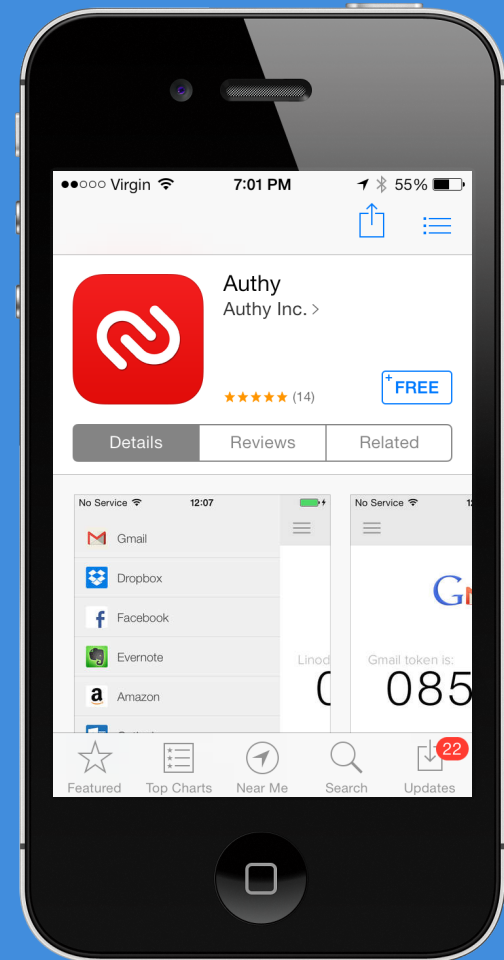

16. Enter the phone number you wish to use to verify your account ownership, then click “Next”

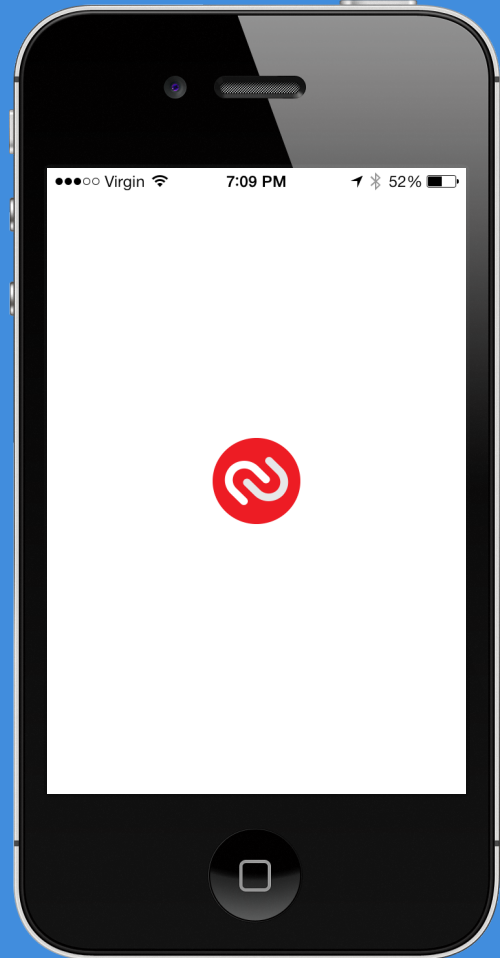

17. Click on the link that you receive via text message from Coinbase.

18. When prompted, download the Authy application.

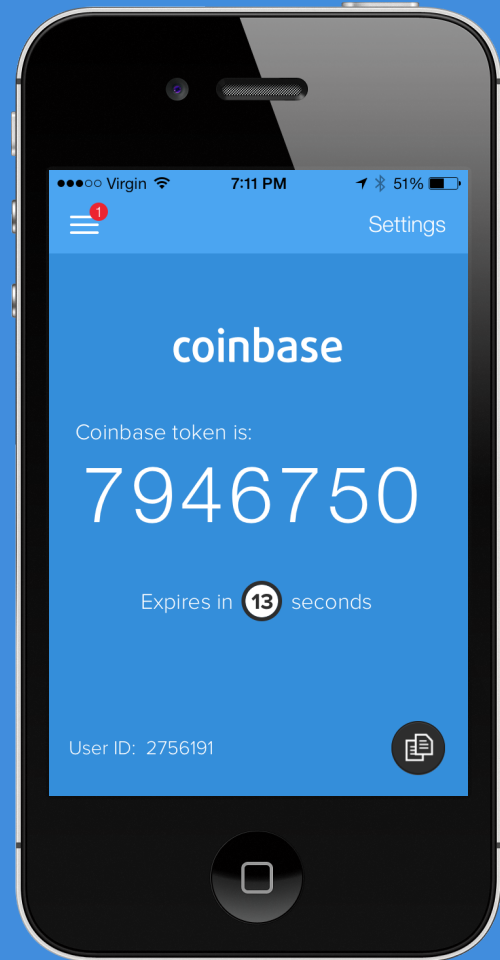

19. Once downloaded, open the Authy application on your phone.

20. Now take note of the code you see on your phone, and enter it into the window on your computer before it expires.

If it does, simply enter the new code given instead.

21. Enter the code you were given in Authy into the “Enter Code” field on the form

### Verify Phone Number

We just sent an SMS to +1 206 852 3665 with instructions to verify your phone.  
If you have a smart phone please install the Authy app (this provides the highest level of security).

On your phone go to [authy.com/install](https://authy.com/install)  
Install the app and register.

You can also request a [text message](#) or [phone call](#) if you don't have a smart phone.

Enter code:

SMS didn't arrive? Try [resetting](#) your Authy account.

Cancel

## My Bitcoin Addresses

Your wallet on Coinbase is a collection of bitcoin addresses. New bitcoin addresses are automatically generated for each payment on Coinbase and stay associated with your account forever (so it is safe to reuse them).

You can add a label or callback URL to an individual address by clicking 'Edit'. Callback urls can be used to receive [automated notifications](#) when a payment arrives.
